

RISE & SHINE TRAVELS • AHMEDABAD

Your customers already expect this. They just **don't get it from you.**

Every trip they book on MakeMyTrip lands on WhatsApp in seconds. Yours doesn't. Phase 2 fixes that — in three weeks, on the website you already have.

0	3	15 min	3 weeks
FOLLOW-UPS YOU SEND WHEN A BOOKING IS ABANDONED	CHANCES TO WIN THEM BACK AFTER PHASE 2	UNTIL THE FIRST ONE REACHES THEIR PHONE	TO SWITCH THE WHOLE THING ON

01 Them vs you, at the five moments that decide a sale

	Browses, never enquires	Leaves at the payment page	Pays and gets the ticket	Day before travel	Two months later
THEM MakeMyTrip, Yatra, Cleartrip	📁 Offer for their number	💬 Chased within the hour	✓ Ticket on WhatsApp	🕒 Check-in reminder	☰ Offers keep coming
YOU, TODAY After Phase 1	✗ Gone, no trace	✗ Nothing happens	🕒 On screen only	✗ Nothing	✗ Typed one by one
YOU, AFTER Phase 2	✓ Number captured	✓ Chased in 15 minutes	✓ Ticket on WhatsApp	✓ Sent automatically	✓ Whole list, one click

02 What it is worth — in your numbers

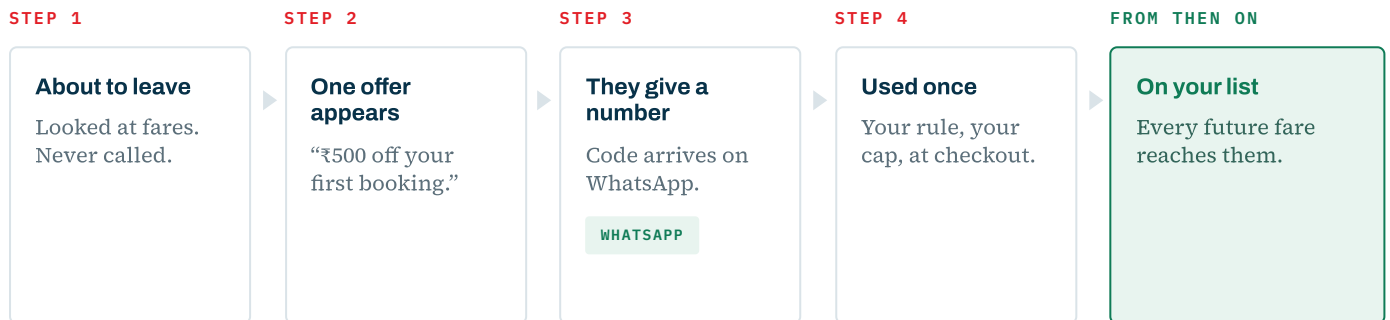

The abandoned-booking maths			FILL IN YOUR OWN FIGURES
		YOUR NUMBER	EXAMPLE
A	People who reach your payment page each month	WRITE HERE	100
B	How many of them you follow up today Not an estimate. There is no follow-up in the system.	0	0
C	If just 1 in 10 comes back once they are chased	A ÷ 10	10
D	What you earn on one booking	WRITE HERE	₹2,000
C×D	Recovered every month	C × D	₹20,000
We are not promising 1 in 10 — put in whatever number you believe. The arithmetic is yours, and from month one your own report shows the real figure. The only number we are certain of is B, which is zero today.			

03 Three ways it earns, on one page

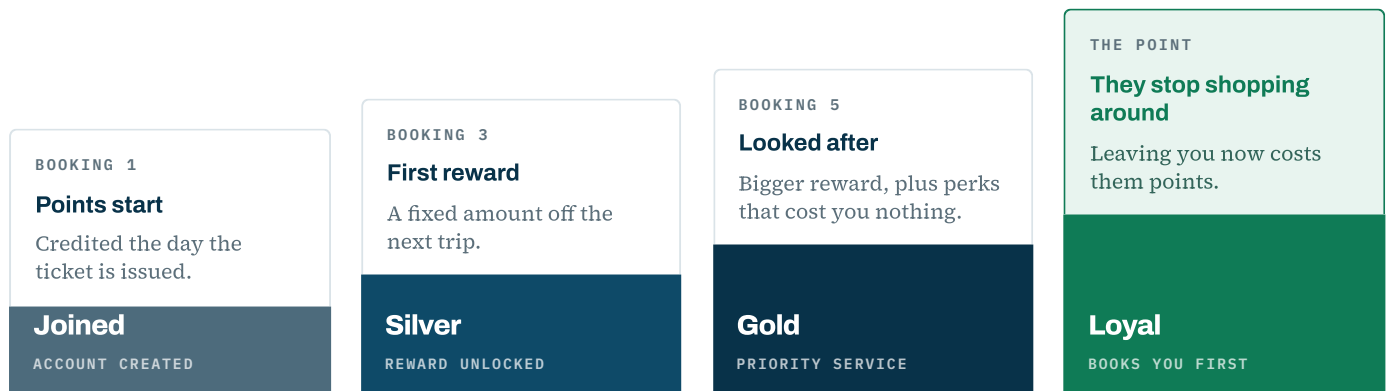

One — the sale that walked away. Today it ends at the payment page.

Two — the visitor who never calls. A small offer buys their number.

Three — the customer who books once. Points make the second trip yours.

BOTH OFFERS STAY CAPPED, ON PURPOSE

A flat 5–10 % off an air fare can exceed your whole margin on that ticket. So the discount and the points are **fixed rupee amounts, capped, on packages and hotels rather than air fare, and expiring after twelve months.** You set every number; we show what each one costs before it goes live.

04 Investment

PHASE 2 — COMPLETE

Build it and switch it on

Live in three weeks

₹65,000

ONE TIME

Keep it running

WhatsApp uptime, approvals, fixes, monthly report

₹10,000

PER MONTH

EVERYTHING INCLUDED

- Booking confirmations on WhatsApp and email
- The abandoned-booking chase, all three steps
- Website pop-up and single-use discount codes
- Points, milestones and rewards on customer accounts
- Campaigns to your existing contact list
- Day-before-travel reminders
- Your reporting screen, plus a monthly report

Half to start, half at go-live. Ex-GST. WhatsApp bills you per message directly — paise for a confirmation, under a rupee for a promotion. We add nothing to it.

When it pays for itself

Arithmetic, not a forecast. ₹10,000 a month is covered by this many recovered bookings:

YOU EARN ON ONE BOOKING	BOOKINGS NEEDED EACH MONTH
₹1,000	10
₹2,000	5
₹3,000	4
₹5,000 a package	2

The one-time ₹65,000 is covered inside the first few months on the same maths. After that the system is the cheapest salesperson in the office — it works nights, Sundays and Diwali, and it never forgets to follow up.

100%

OF THEM LEAVE SILENTLY

Every month this waits, the same thing happens. Everyone who reaches your payment page and hesitates walks away and hears nothing — while MakeMyTrip messages the same customer within the hour and books the trip you had almost won. The traffic is already yours. Only the follow-up is missing.

05 Three weeks — and what we need from you

- Week 1 — WhatsApp live in your business name; every booking confirmed on WhatsApp and email.
- Week 2 — the abandoned-booking chase, the pop-up and the discount codes go live.
- Week 3 — points and rewards, your contact list imported, campaigns ready, team trained.
- From you: GST certificate and business papers for WhatsApp verification · a decision on the phone number (once it goes on WhatsApp's business system it leaves the handset app) · the discount and points values · your contact list in Excel · a yes on the wording.
- The only clock we don't control is Meta's verification of your business — usually a few days. It starts the day you send the papers, and everything else runs alongside it.

To get started

- 1 Approve Phase 2. ₹65,000 to build, ₹10,000 a month to run.
- 2 Send the business papers this week — that starts Meta's clock.
- 3 Tell us the discount and the number. Both are one-time decisions.
- 4 Three weeks later — nothing walks away unnoticed again.
